

Empowering game developers with a seamless RPC designed for decentralized gaming

Enhance the capabilities of your game development platform by seamlessly integrating a multi-chain RPC solution crafted for Web3 gaming

Start Powering Your Game Platform with The Portal

Why choose the Portal?

The Portal is your cheat code to offering performant RPC to games devs

#1

Decentralized RPC provider

UNRIVALED PERFORMANCE

Enjoy low latency RPC and consistently high uptime for seamless in-game transactions and ultra-smooth gaming experiences even when TPS moons unexpectedly.

33+

Multichain Support

EFFORTLESS INTEGRATION

Keeping up with the latest chains, with new networks supported every week, enables game developers to adjust their strategies quickly as needed.

20k+

Nodes Across Regions

DECENTRALIZATION AND RELIABILITY

Boost your game development with our truly decentralized protocol, featuring thousands of globally distributed nodes for optimal decentralization and usability

“Portal nodes have been consistently servicing between 100 to 1200 million daily RPC relays for DFKchain, thus offering Crystalvale players enhanced redundancy and superior game reliability. Almost every DFK player has at one point or another used Portal’s RPCs.”

Frisky Fox
Founder of DeFi Kingdoms

Trusted by

Your web3 gaming developer tooling can also be decentralized

Empower your gaming devs with key infrastructure advantages:

Improve the web3 player experience

Optimized RPC services balanced across all major regions, ensuring playability despite network spikes.

Boost trust in your game platform

Equip developers with RPC for minting game items on-chain, liquidity asset management and dynamic game economies.

Connect to unlimited private endpoints

Speed up new chain support to serve your game developers, ensuring decentralization and redundancy for developer trust.

Customized pricing and support

Flexible plans for diverse tooling needs, enabling predictable infrastructure costs at scale.

Affordable Pricing Plans for Your Web3 Needs

Developer
Free Testing

Check out the latency and reliability for games. Test with the market’s highest request limit, no TPS.

Team
Pay as you go

For growing development tooling usage, scale as you need it with the support to get you there.

Enterprise
Get a Quote

Designed for high volume requests with everything you need to support millions of players globally.

Experience The Portal Decentralizing Your Developer Tools.
