Why Choose Portal?

Experience the Ultimate Decentralized RPC Solution

99%

Uptime Performance

UNRIVALED PERFORMANCE

Experience blazing-fast response times, 99% uptime, and minimal latency. Deliver a seamless user experience and stay ahead of the competition.

32+

Chains Supported

EFFORTLESS INTEGRATION

Instantly connect to 32+ blockchain networks, and let Portal handle updates and forks. Save time and focus on your wallet's core features.

20k+

Nodes Globally Distributed

DECENTRALIZATION AND RELIABILITY

Leverage our truly decentralized protocol with thousands of nodes globally distributed, balancing decentralization and usability. Empower users with a secure and accessible wallet solution.

"Portal's RPC services have transformed our wallet development process, enabling us to focus on building innovative features and driving our project forward. We no longer have to worry about managing the infrastructure issues that used to slow us down. Portal has been a game-changer for our productivity, and we highly recommend it to other teams."

Trusted by web3 wallets worldwide

Developer-Centric Innovation for More Robust Wallets

Minimize engineering effort

Allow your team to focus on creating innovative wallet solutions.

Reduce latency and costs

Delivery transaction speed and uptime for your users.

Connect unlimited private endpoints

Simplify new chain integration.

Increase your wallet decentralization

Ensure user security over their own assets.

Affordable Pricing Plans for Your Web3 Needs

Developer Free Testing

Check out for free the latency speed and reliability for wallets. Test with the highest limit in the market with no TPS

Team Pay as you go

For growing wallets on their way to the moon, scale as you need it with the support to get you there.

Enterprise Get a Quote

For high volume requests and everything needed to support million of users of your wallet.

Start Today and Strengthen Your Wallet with Portal's Powerful RPC Services!
